DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, and 27 are drawn to embedding information within original data by dividing the data into groups to be masked, classified in class 382, subclass 100.
- II. Claims 24-26 are drawn to bypassing removal of embedded data during compression by using separate data embedding techniques, classified in class 382, subclass 235.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as encoding and decoding data to retrieve auxiliary information. See MPEP § 806.05(d).

Conclusion

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
